

# Set of ballast weights

A set of ballast weights useful for setting calibration and for other metrological tasks. Delivered including the approved calibration.

May be adjusted by the customer request.

# Transport box for the measuring systems

The transport box is composed from multiple partial boxes which allow storing:

- measuring instrument or system
- cabling
- power supply
- sensors
- notebook
- other accessories

Each partial box may be used separately, or any number of them may be assembled together and be moved around using a trolley. Also the trolley may be ordered separately.

The boxes can be ordered and configured according to the customer's needs, according to the measuring system and its accessories, with or without padding. Based on the specification, padding for other components of the measuring system may be delivered as well.

The transport set is recommended to be ordered as a whole, to be able to store various accessories of the measuring system safely, and to be able to manipulate with them easily.

# Workshop table for adjusting pantographs

The workshop table facilitates fixing the pantograph in a stable way outside the vehicle roof. It has therefore a versatile usage for manufacturing the pantographs, for service interventions, repairs, setting and measuring the pantograph using 150SMC or 300SMC system, reflecting the necessary precision and workplace safety. The table is designed with manufacturing and repairs of pantographs in sight to provide an indispensable companion for a proper setting and adjusting of the pantograph. The table is a necessary also for measuring the transverse rigidity required by EN 50206.

- the workshop table constitutes a rigid steel frame
- the table is decomposable to facilitate its transport
- a shorter and longer version of the table available – the longer one useful also for the older types of double-arm pantographs used especially

Length:	1600 mm, 1800 mm
Width:	1200 mm
Height:	800 mm

#### Standard surface coating:

- Powder coating RAL 5010, may be changed by the customer request

#### Special surface coating:

- Hot-dip galvanizing and powder coating

#### Other accessories:

- Posts for measuring the transverse rigidity
- Auxiliary workshop table with a drawer unit for tools and with shelves
